

West Africa - MAURITANIA

Seismic data

1,611 Kms survey length
Original data dated 1972

Streamer 2,400m
Data length 7.0 sec

A scanned and reprocessed 2D dataset covering offshore blocks 1,2 & 10 to the Northwest of Cap Timiris. The area covered by the survey appears to be a Northern continuation of the Nouakchott embayment which has good source rock indications and prospect potential.
